## DETAILED ACTION

### *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose an image display apparatus having a moving reflecting mirror for swinging in order in an incidence direction of light from each of the light emission sources in response to the pulse driving timing of each of the light emission sources and reflecting light beams from the light emission sources in order approximately in the same direction, or a rotating prism having a reflecting surface inclined at a predetermined angle with an optical axis, for rotating on the optical axis in response to the pulse driving timing of each of the light emission sources, thereby driving the reflecting surface in an incidence direction of light from each of the light emission sources for reflecting the light in the optical axis direction, wherein the light reflected by the moving reflecting mirror or the rotating prism is guided into a light valve (claims 1 and 4). The remaining claims 2, 3 and 5 are allowed by virtue of their dependencies on the independent claim 1. Hence, the examiner has allowed claims 1 through 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2828

Hashizume et al., Patent No. 5,865,521 ; Salerno et al., Patent No. 5,396,304 ; Nakayama et al., Patent No. 5,626,409.

None of the above patents discloses the image display apparatus as recited.
